Identifying UniOP Firmware

UniOP firmware chips are given part numbers based upon the release number, the firmware ID and a name code:

N.NNN FWXXXX YY

- N.NNN is the release number
- XXXX is the name code
- YY is the firmware ID

For example, a version of firmware may be labeled as: 4.07Y FWDNET 32

The list of firmware ID numbers and name codes are given below.

Firmware ID Number	Description
23	TES06Ax
24	BTC02 / BTC22
25	BRD01
26	T832 A2
27	T832 A
29	T832
30	T320, 20/30 MHz, 512K Flash
31	TCA05, 24 MHz
32	T320, 20 MHz, 512K Flash
33	T320, 20/30 MHz, 512K Flash

Name Code	Description
DNLD	UniOP Firmware with Protocol Download
DNET	UniOP Firmware with UniNET
T3BL	T320 Bootstrap Loader
T3DL	Downloadable graphic FW for T320 HW 33
T3TX	Downloadable text mode FW for T320 HW 22
