3. How to install ADISRA SmartView

Before installing ADISRA SmartView, you will need to first install the necessary files for it to work. Please follow the directions below to correctly install the latest version of ADISRA SmartView.

3.1. Installing the prerequisites

- 1. First, you will need to check which architecture your machine is running on. To do that, access the Windows "System Information" and search for "System Type."
- 2. Once the system type is confirmed, please open the correct OPC Core Components folder and, as an administrator, proceed to execute the installation file. If you already have it installed, please still execute the file to ensure that you have the correct version.
